Academic stress and academic burnout in adolescents: a moderated mediating model

Results: ①Academic stress was significantly and positively correlated with academic anxiety and academic burnout, and significantly and negatively correlated with academic self-efficacy. ②Academic anxiety partially mediated the relationship between academic stress and academic burnout. ③Academic self-efficacy significantly moderated the direct effect of academic stress on academic burnout, and higher academic self-efficacy could buffer the negative effect of academic stress. ④Academic self-efficacy significantly moderated the second half of the mediated model's path (academic anxiety → academic burnout), that is, low academic self-efficacy amplified the risk effect of academic anxiety on academic burnout.

Conclusion: Academic anxiety partially mediates the relationship between academic stress and academic burnout, and this mediating role is moderated by academic self-efficacy.

Highlights

- Academic stress can positively predict academic burnout.
- This finding suggests that academic self-efficacy can reduce the association between academic stress and academic burnout and enhance the association between academic anxiety and academic burnout.
- Helping people gain a deeper understanding of the factors associated to academic burnout.
- Helping people to make more reasonable interventions to adolescents who have academic burnout.

UNDERLYING ISSUE

- Students today are increasingly under pressure from heavy academic workloads, social expectations, and constant performance demand which often leads to chronic stress, anxiety, and even academic burnout.
 - Research shows a strong link between academic stress and burnout in adolescents: for example, a study found that high academic stress predicts higher burnout, and this in turn negatively affects students' mental health and motivation.
 - Beyond just exhaustion, burnout can lead to emotional detachment, lower self-efficacy, and disengagement, making it harder for students to learn effectively and maintain their well-being.
- 

This platform empowers students to take control of their wellbeing and academic life while giving teachers the tools they need to support their class in a more informed, proactive way. It helps reduce burnout, improves productivity, and creates a healthier school environment powered by AI.

FIGHTING STUDY BURNOUT

- Many students feel overwhelmed and burned out by constant studying
- Traditional study tools focus only on productivity – not emotional wellbeing
- Motivation drops when studying feels like a chore instead of a journey

OUR GOAL: make learning fun, engaging, and mentally healthier

By mixing mood check-ins, smart planning and relaxation...

- **students can study smarter, not harder**
- **feel supported instead of stressed**

1 AI summary yesterday.

1 MOOD N ENERGY

- A 5-second daily check-in to capture current feelings.
- Measures both emotional Mood and physical Energy levels.
- Helps students identify the source of distress
- Generates a gentle, 2-3 sentence supportive summary and targeted advice upon saving the log.

Mood & Energy Check-in

Quickly log how your mind and body feel right now.

Mood level

☹️ A bit low

Energy level

⚡ Low

Anything you want to note? (Optional)

I feel depressed

Save & Get Summary

Thank you for checking in and sharing that you are feeling low and depressed today. Please remember to be gentle with yourself right now, and know that even the smallest actions, like getting a glass of water or taking a moment to rest, are achievements. Be kind to yourself today.

SURVEY

- Simple, quick reflection system for daily emotional tracking.
- Allows user input on mood (happy, sad, anxious, neutral) and an energy level
- The app stores daily entries in self.last_checkin to personalize study and workload.
- Affects difficulty, schedule length, and study intensity.

3 ASSESMNET

- Allows user input on total study time and subjects list.
- Energy level sets study-to-break ratio; lower energy → shorter sessions.
- If mood is low, the planner gently reduces study intensity for mental comfort.
- Generates a clean, hour-by-hour study schedule printed in GUI.

Study Assessment

Add your subjects and marks (out of 100). We'll help you see where to focus.

Subject	Mark / 100	
Math	80	×
Physics	77	×
Chemistry	74	×

Add subject

Get AI Advice

Overall Average: 77.0%

 Improvement Advice

Concentrate on bolstering Chemistry (74%). Practice 15-20 stoichiometry and calculation problems daily to build fluency. Use active recall methods (flashcards/self-quizzing) for challenging conceptual areas like thermodynamics or equilibrium definitions. This targeted approach will solidify foundational knowledge and drive rapid improvement in your lowest mark.

4

AI PLANNER

- Allows user input on total study time and subjects list.
- Energy level sets study-to-break ratio; lower energy → shorter sessions.
- If mood is low, the planner gently reduces study intensity for mental comfort.
- Generates a clean, hour-by-hour study schedule printed in GUI.

6 HELPER.AI

Many students hesitate to approach teachers or counselors. The chatbot gives them immediate, private support — reducing stress, boosting confidence, and helping them stay organized

- Answers academic questions or provides study tips
- Gives motivational reminders and time-management advice
- Suggests relaxation activities when stress or low mood is detected
- Provides emotional support using empathetic, supportive language

The screenshot displays the MindEase - Student Wellbeing web application. On the left is a dark sidebar with a menu containing: Home, Mood & Energy, Survey, Assessment, AI Planner, Relax, **AI Helper** (highlighted with a blue button), and Report. The main content area on the right is titled "AI Helper" with the subtitle "A gentle, anonymous helper. It listens and offers small suggestions." Below this is a chat interface. The chat history shows a greeting from the AI Helper: "Hi, I'm the MindEase AI Helper. I'm here to listen. You can talk about school, stress, anything on your mind." A user input bubble contains the text: "I have exams coming up next week, I haven't studied much, I feel stressed help me o". The AI's response reads: "Oh, that sounds like a heavy feeling. Take a deep breath first—you're okay. Let's make a tiny, practical plan right now: 1. **Pick One Thing:** What is the single most important topic you can spend 20 min *right now*? 2. **Stop the Guilt:** You can't change the past study time. Focus only on the next 2 3. **Hydrate:** Grab a glass of water. Remember, small actions build momentum. Start with that 20 minutes. You can do thi". At the bottom of the chat area is a text input field and a blue "Send" button.

7 WELL BEING REPORT

- Combines data from Mood, Energy, Survey results, etc, into one cohesive summary.
- The app identifies hidden trends
- Generates a short, personalized report with specific areas of Strength and Challenge.
- Provides a clear path forward with 1-2 small, actionable suggestions for the upcoming week.

FUTURE PLANS

"AND OF COURSE, THIS IS ONLY A PROTOTYPE. WE KNOW THERE'S A LOT MORE POTENTIAL FOR THIS SYSTEM. IN THE FUTURE, WE HOPE TO EXPAND THE PLATFORM WITH MORE PERSONALIZED AI FEATURES, DEEPER EMOTIONAL ANALYTICS, AND TOOLS THAT CAN ADAPT TO EACH STUDENT'S UNIQUE NEEDS. OUR GOAL ISN'T JUST TO CREATE AN APP—IT'S TO BUILD A LONG-TERM SOLUTION THAT GENUINELY SUPPORTS STUDENTS' WELL-BEING.

WITH MORE DEVELOPMENT, TESTING, AND COLLABORATION, WE'RE CONFIDENT THIS PROJECT CAN CREATE REAL, MEANINGFUL CHANGE FOR STUDENTS WHO STRUGGLE WITH BURNOUT."

THANK YOU
